PROJECTS

Vrinda Store Annual Report - Excel Project   [View in GitHub](#)

- Developed a comprehensive dashboard that provides insights into key metrics such as Total Sales and Total Orders for 2022.
- Analyzed Sales Channel Contribution, showing that Amazon, Flipkart, and Myntra are the leading channels (~80% contribution).

Credit Card Transaction and Customer Dashboard - Power BI Project   [View in GitHub](#)

- Developed a comprehensive weekly dashboard providing real-time insights into key performance metrics and trends.
- Identified that overall revenue is 57M, with male customers contributing 31M and female customers contributing 26M. Blue & Silver credit cards account for 93% of overall transactions.

Pizza Sales Analytics - MySQL Project   [View in GitHub](#)

- Developed a comprehensive analysis of sales, products, customer preferences, and time-based ordering patterns to uncover key insights.
- Identified peak order times between 12 PM and 7 PM, with top sellers being Classic Deluxe Pizza, Barbecue Chicken Pizza, and Hawaiian Pizza.

Diwali Sales Data Analysis - Python Project   [View in GitHub](#)

- Analyzed Diwali sales data to uncover key insights such as Gender and Age Group Dynamics, State-wise Sales, and Product Category Preferences.
- Identified that married women aged 26-35 from Uttar Pradesh, Maharashtra, and Karnataka, working in IT, Healthcare, and Aviation, are most likely to purchase products from the Food, Clothing, and Electronics categories.
